Bend Sinister					Chevron Inverted					Sinister			
* There are a few special cases where blazons don't follow the patterns shown above: A cross-wise division is blazoned "quarterly." The dexter-side ordinary is blazoned a "tierce," and the sinister a "tierce sinister." Arrangements may also be blazoned by number, so three charges in chevron are "one and two," or if in chevron inverted, "two and one."					Pall					Canton
